

TAXI & PRIVATE HIRE

Go electric without buying a fleet, and keep every driver earning.

Electric and hybrid vehicles for taxi and private hire operators and drivers, on weekly, monthly or long-term hire, with maintenance, replacement vehicles and charging support managed for you.

Weekly, monthly or long-term hire

Maintenance included

Replacement vehicles

Charging plan

Built around how taxi businesses make money

A vehicle off the road is a driver not earning. Everything we do is designed to keep your fleet working while you move to cleaner vehicles.

Drivers keep earning

Maintenance, breakdown cover and replacement vehicles mean a fault costs a driver hours, not days off the road.

Cleaner fleet, fewer restrictions

Zero-emission vehicles that help you meet clean air zone rules and your licensing authority's emissions policies.

No capital tied up

Put drivers in electric vehicles without buying them, and without carrying the risk of what they will be worth later.

Maintenance handled

Servicing, tyres and repairs through our national service network, managed by us, so you run a taxi business, not a workshop.

Charging sorted

A charging plan for your drivers: home charging, depot charging installed at your base, or access to public charging.

Scale with demand

Add vehicles as you take on drivers or contracts, and hand them back when you no longer need them.

From one driver to a whole fleet

Private hire operators

Grow or refresh your fleet with electric vehicles on terms that match how you take on drivers.

Hackney carriage operators

Move to cleaner vehicles while keeping the fleet on the road and earning.

Owner-drivers

Drive electric without buying a car, with maintenance and a replacement vehicle if something goes wrong.

Councils and licensing authorities

Support the move to cleaner taxis in your area with a supply route operators and drivers can use.

THE VEHICLES

Electric and hybrid vehicles for every kind of fare

Saloons & hatchbacks

Comfortable everyday vehicles for local and town work.

Estates

Extra boot space for airport, station and luggage-heavy journeys.

SUVs

A higher, more spacious ride for executive and longer journeys.

Seven-seat vehicles

People carriers for groups, families and contract work.

Hybrids

A step towards electric where shifts and charging are not ready yet.

Not sure?

Tell us your shifts and work types and we will recommend a mix.

HIRE TERMS

Terms that fit taxi work

Weekly hire

Flexible hire that suits new drivers, trials and short-term demand.

Monthly hire

Lower admin and a steadier rate for established drivers.

Long-term contract hire

Vehicles for the long run with maintenance and support included in one charge.

INCLUDED AND AVAILABLE

One team keeping your vehicles working

- ✓ Servicing and maintenance through our national service network
- ✓ Breakdown cover and roadside assistance
- ✓ Replacement vehicles when one is off the road
- ✓ A charging plan for every driver
- ✓ Delivery and handover with condition recorded
- ✓ One point of contact and fleet reporting for operators

CHARGING

A plan for every driver

Charging is planned before vehicles arrive, around real shifts and breaks.

- ✓ **Home charging** for owner-drivers who can charge off-shift
- ✓ **Depot charging** installed at your base
- ✓ **Public charging** built into shift patterns
- ✓ **Mobile charging** for trials and peaks

From first call to first fare

1 Tell us about your operation

Drivers, shifts, work types and the licensing authority you work with.

2 Choose vehicles and terms

Vehicles matched to your work and a hire term for each driver or the whole fleet.

3 Licensing and charging

We work through your licensing authority's vehicle requirements with you and agree a charging plan.

4 Delivery and handover

Vehicles delivered with condition recorded, and drivers shown how to get the most from them.

5 On the road, supported

Maintenance, breakdown cover and replacements managed through one point of contact.

Licensing

Taxi and private hire vehicles must be licensed by your local licensing authority, and each authority sets its own vehicle conditions. We work through your authority's requirements with you before supply.

Insurance

Vehicles used to carry paying passengers must be insured for hire and reward. We talk through how cover is arranged as part of your quote, and vehicles should not be used for work until cover is confirmed.

Always check current requirements with your licensing authority and on GOV.UK.

NEXT STEP

Get your drivers on the road in electric vehicles.

Tell us about your operation and where you are licensed. We will come back with suitable vehicles, hire terms and a charging plan.
